# Social Environment Variables

## ACS 2006-2010 Variables (5-Year Estimates)

Census Tract ACS 2006-2010 variables were acquired from Social Explorer ([www.socialexplorer.com](http://www.socialexplorer.com)) at the 2010 Census Tract unit or level of geography. The original census variable names were slightly modified in order to provide a systematic naming and to provide an indicator of the type of variable being provided. The ACS census variable names use the following naming convention:

- |   |   |
|---|---|
| <p><b>1</b> Variables are prefixed with 1 value, where '**' equals:</p> <ul style="list-style-type: none"><li>○ <b>t10</b> = tracts, 2010</li></ul> | <p><b>2</b> Variables are suffixed with 1 of 5 values, where 'x' equals:</p> <ul style="list-style-type: none"><li>○ <b>c</b> = count</li><li>○ <b>p</b> = percent</li><li>○ <b>d</b> = density <i>(highlighted in purple text)</i></li><li>○ <b>a</b> = average <i>(highlighted in blue text)</i></li><li>○ <b>m</b> = median <i>(highlighted in red text)</i></li></ul> |
|---|---|

♠ Please note that there are very few *average* and *median* variables provided, which is why they have been highlighted in colored text for easy identification. Any *count* variable also has a corresponding *percent* variable. Only one *density* variable is provided, and that is *population density* (\*\*\_001001d).

\*\*\_ctcnt – Count of unique census tracts intersecting each neighborhood definition.
